Central Bicol State University of Agriculture*

GUIDE QUESTIONS

1. What is a computer and what is its main purpose?
2. What are the basic characteristics of a computer?
3. What are some capabilities/limitations or disadvantages of using computers?
4. How does the use of computers impact our daily lives?

DEFINITION OF COMPUTER

A computer is a high-speed electronic machine that accepts data and instructions, processes them, and generates useful information as output.

CHARACTERISTICS OF COMPUTER

- **It is a machine;**
 - It is an inanimate object;
 - It needs human intervention; and
 - It can only do things for it was designed.
- **It is electronic;**
 - It is made up of electronic circuits
 - It runs on electrical energy

CHARACTERISTICS OF COMPUTER

- **It is automatic;**
 - Once it is started, it continues to run without outside intervention.
- **It can manipulate data;**
 - It can perform arithmetic functions such as MDAS operation.

CHARACTERISTICS OF COMPUTER

- **It has memory;**
 - It has the capacity to remember what it has been done;
 - It can store instructions in its memory and follow these through unaided

CAPABILITIES AND LIMITATIONS OF COMPUTER

- **Speed** - Processes data very fast
- **Repetitiveness** - Repeats tasks without boredom
- **Storage & Recall** - Saves and retrieves information
- **Accuracy & Consistency** - Produces correct results every time
- **Logical Operation** - Makes decisions based on conditions
- **Communication** - Connects and shares information globally
- **Self-checking** - Detects and verifies errors

DISADVANTAGES OF USING OF COMPUTER

- **Safety Risk** - Personal data may be exposed
- **Health Risk** - Long use may cause strain/injuries
- **Environmental Impact** - Improper disposal releases toxins
- **Use of Power** - Needs electricity to run
- **Privacy Violation** - Data can be stolen or misused

TEN COMMANDMENTS OF COMPUTER ETHICS

1. Thou shalt not use a computer to harm other people.
2. Thou shalt not interfere with other people's computer work.
3. Thou shalt not snoop around in other people's computer files.
4. Thou shalt not use a computer to steal.
5. Thou shalt not use a computer to bear false witness.
6. Thou shalt not copy or use proprietary software for which you have not paid.

TEN COMMANDMENTS OF COMPUTER ETHICS

7. Thou shalt not use other people's computer resources without authorization or proper compensation.
8. Thou shalt not appropriate other people's intellectual output.
9. Thou shalt think about the social consequences of the program you are writing or the system you are designing.
10. Thou shalt always use a computer in ways that ensure consideration and respect for your fellow humans.

THANK YOU!
