GUIDE QUESTIONS

1. What is Information Technology (IT)?
2. What are the main components of IT?
3. How does IT impact communication?
4. What advantages does IT bring to society?
5. What disadvantages can result from IT?
6. What is the difference between IT and ICT?

INFORMATION TECHNOLOGY

- Use of computers, software, and networks
- Create, process, store, and share data
- Includes hardware and software
- Supports communication and daily activities
- Ensures data security and ethical use

COMPONENTS OF INFORMATION TECHNOLOGY

Hardware

Software

Network

Data

User

COMPONENTS OF INFORMATION TECHNOLOGY

- **Hardware**

- The physical parts of a computer system (e.g., CPU, monitor, keyboard, smartphone).

- **Software**

- Programs and applications that run on hardware (e.g., operating systems, apps, tools).

COMPONENTS OF INFORMATION TECHNOLOGY

- **Network**

- Systems that connect computers and devices to share data and resources.

- **Data**

- Information that is created, processed, stored, and managed.

COMPONENTS OF INFORMATION TECHNOLOGY

- **People/Users**

- Individuals who use IT systems to perform tasks and make decisions.

ADVANTAGES OF INFORMATION TECHNOLOGY

**Improved
Communication**

**Global
Connectivity**

**Productivity and
Efficiency**

**Job
Opportunities**

IMPACT OF INFORMATION TECHNOLOGY IN COMMUNICATION

- **Faster communication**
 - Emails, instant messaging, and video calls enable real-time interaction.
- **Global connectivity**
 - Allows people to connect across countries and cultures.
- **Cost-effective**
 - Reduces expenses compared to traditional mail or long-distance calls.

IMPACT OF INFORMATION TECHNOLOGY IN COMMUNICATION

- **Accessible anytime, anywhere**
 - Mobile apps and online platforms make communication available 24/7.
- **Collaboration tools**
 - Platforms like Zoom, Google Meet, and Slack support teamwork and remote work.

IMPACT OF INFORMATION TECHNOLOGY IN COMMUNICATION

- **Improved Communication**
 - Faster, cheaper, and more efficient ways to connect globally.
- **Access to Information**
 - Easy and quick access to knowledge and data online.
- **Education Advancement**
 - e-learning, online resources, and digital classrooms.

IMPACT OF INFORMATION TECHNOLOGY IN COMMUNICATION

- **Healthcare Improvement**
 - Modern medical equipment, telemedicine, and health data management.
- **Job Opportunities**
 - New careers in programming, software development, networking, and IT support.

IMPACT OF INFORMATION TECHNOLOGY IN COMMUNICATION

- **Convenience**

- Online shopping, banking, and services available anytime.

- **Globalization**

- Connects people, businesses, and cultures worldwide.

- **Productivity & Efficiency**

- Automation and information systems improve work processes.

NEGATIVE IMPACT OF INFORMATION TECHNOLOGY

**Privacy
Concern**

Cyberbullying

**Job
Displacement**

**Information
Overload**

NEGATIVE IMPACT OF INFORMATION TECHNOLOGY

- **Unemployment**

- Automation and computer systems replace some human jobs.

- **Job Insecurity**

- Rapid changes in technology require constant learning to stay employable.

NEGATIVE IMPACT OF INFORMATION TECHNOLOGY

- **Security Risks**
 - Hacking, identity theft, and data breaches threaten individuals and companies.
- **Privacy Concerns**
 - Personal data can be tracked, collected, and misused.
- **Cultural Domination**
 - Stronger cultures (e.g., Western influence) overshadow local traditions.

NEGATIVE IMPACT OF INFORMATION TECHNOLOGY

- **High Costs**
 - Implementing and maintaining IT systems can be expensive.
- **Addiction & Overuse**
 - Excessive screen time affects health and social life.
- **Digital Divide**
 - Not everyone has equal access to technology, creating inequality.

What is the difference between IT and ICT?

IT (Information Technology)

- Focuses on computers, software, networks, and systems used to process, store, and secure data.
- Commonly applied in businesses, corporations, and industries.
- Includes roles like programmers, system administrators, and network engineers.

What is the difference between IT and ICT?

ICT (Information and Communication Technology)

- Broader term that combines IT with communication tools (e.g., telephony, internet, audiovisual devices).
- Often applied in education, learning environments, and smaller institutions.
- Focuses on using technology for communication, collaboration, and information sharing.

THANK YOU!
