What is the Internet?

- The Internet is a global network of interconnected computers that communicate and share information with each other.
- It allows people all over the world to send messages, share data, access information, and connect using various online services like websites, e-mail, and social media.

What is the Internet?

- A global network of computers
- A worldwide system of connected networks
- A tool for communication and information sharing
- The network of networks
- A system that connects people across the world
- A source of unlimited information
- A medium for online communication and collaboration
- A gateway to digital knowledge and services
- A platform for business, education, and entertainment
- The backbone of modern communication

Uses of the Internet

- ☐ Communication
- ☐ Shopping (E-Commerce)
- ☐ Leisure and Entertainment
- ☐ Exploring the World

Communication

The Internet provides many ways to connect and interact with people around the world:

- ❑ **E-mail** – Sending and receiving electronic messages.
- ❑ **Blogs** – Sharing personal experiences or opinions online.
- ❑ **Social Networking Sites** – Connecting and communicating with others (e.g., Facebook, Instagram, Twitter).
- ❑ **Chatrooms & Forums** – Real-time discussions and topic-based conversations.
- ❑ **VOIP (Voice over Internet Protocol)** – Making voice or video calls over the Internet (e.g., Zoom, Skype).

Shopping (E-Commerce)

Users can buy and sell products or services online anytime, anywhere.

Examples: Shopee, Lazada, Amazon, eBay.

- Makes shopping convenient, faster, and accessible worldwide.

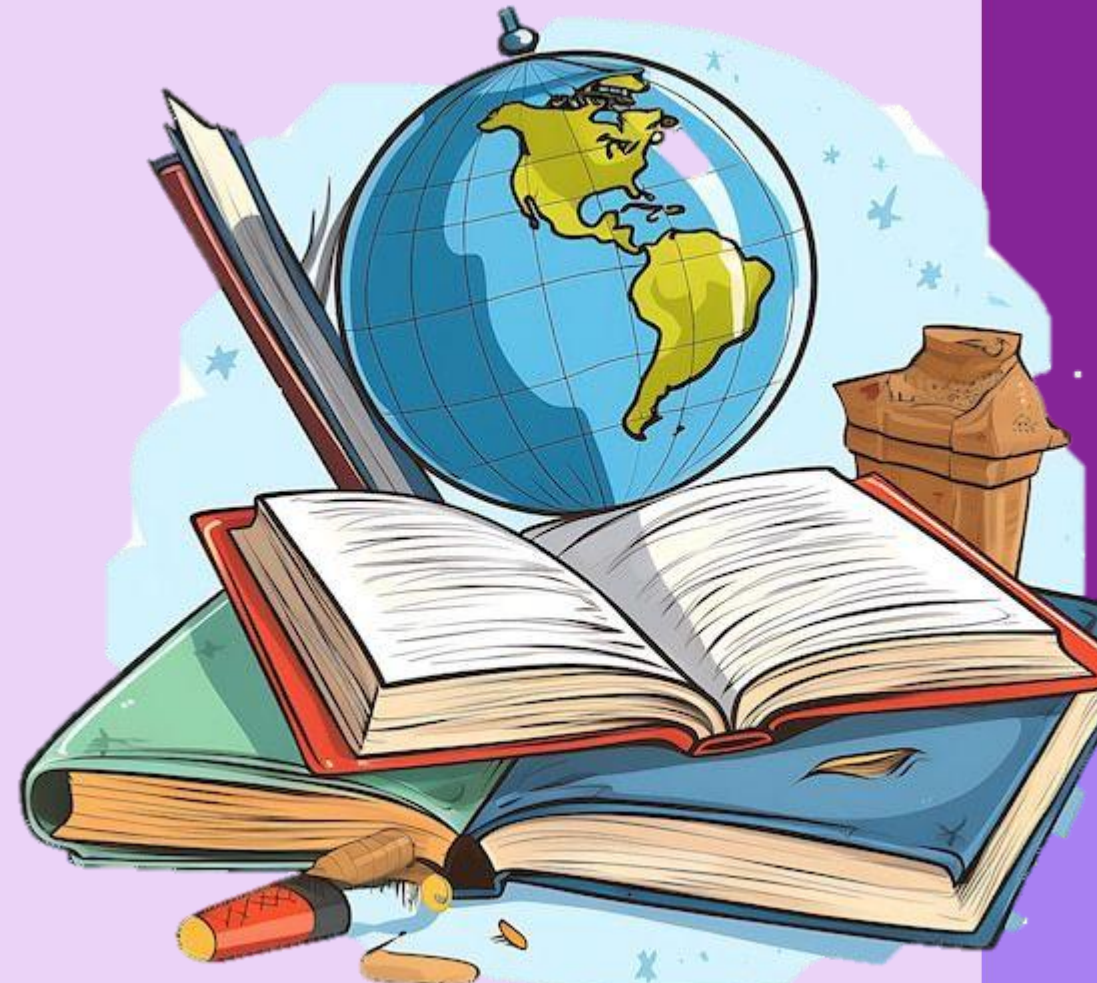

Leisure and Entertainment

- ☐ Playing online games
- ☐ Listening to music (download or stream)
- ☐ Reading books or e-books
- ☐ Watching movies or videos (e.g., YouTube, Netflix)
- ☐ Booking holidays or concert tickets
- ☐ Reading about hobbies, news, and sports
- ☐ Watching catch-up TV or live streaming events

Exploring the World

- ❑ Online booking for travel and accommodations.
- ❑ Virtual tours and digital travel experiences.
- ❑ Learning about different cultures, landmarks, and destinations through videos, photos, and blogs.
- ❑ Encourages global awareness and digital exploration from anywhere.

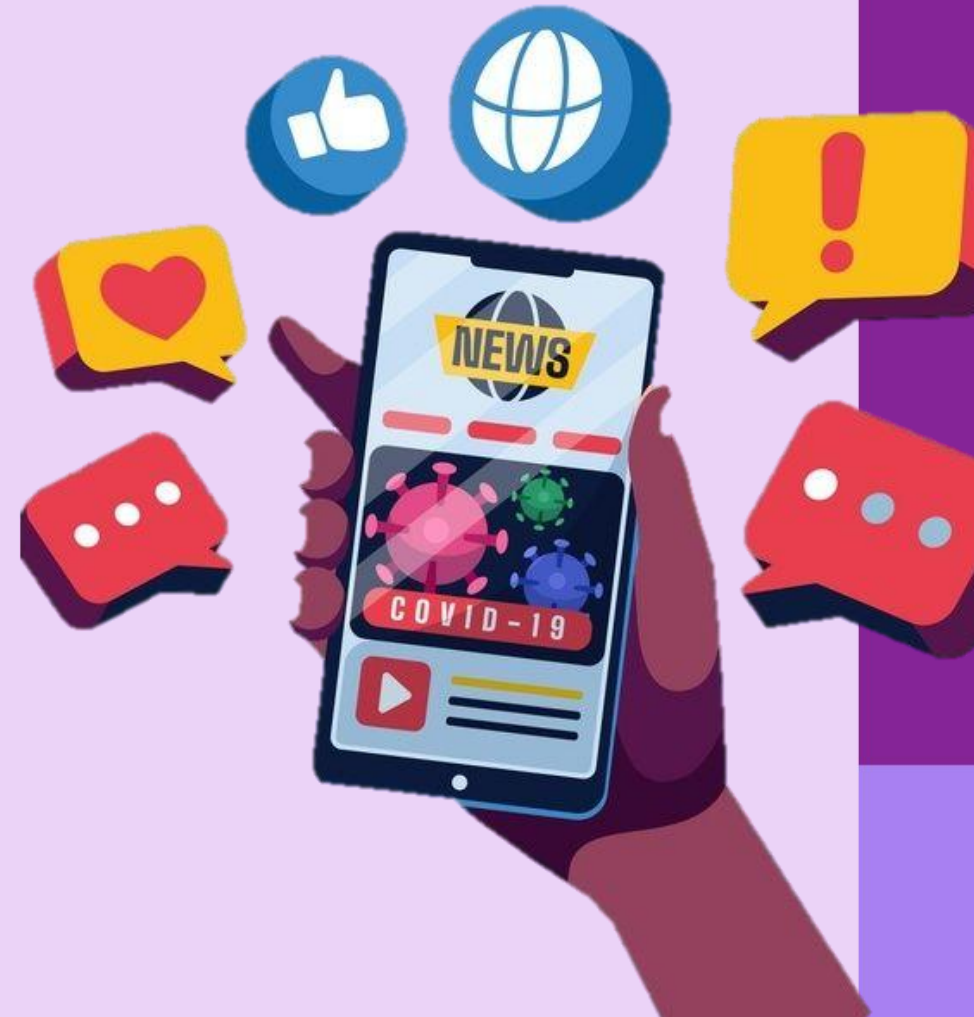

Benefits of the Internet

The Internet provides people with unlimited access to information, communication, and services anytime and anywhere, making it one of the most important technologies in modern life.

Benefits of the Internet

1. The Internet is Always Available

- ☐ Accessible 24 hours a day, 7 days a week, 365 days a year.
- ☐ Unlike physical businesses, online services are open anytime.
- ☐ Some websites may be temporarily unavailable due to maintenance or updates, which is normal.

Benefits of the Internet

2. The Internet Offers a Vast Range of Information

- ☐ Provides unlimited information on almost any topic.
- ☐ Search engines (like Google or Bing) make it easy to find data using keywords.
- ☐ Users must evaluate sources carefully — not all information is accurate or reliable.
- ☐ Encourages responsible use and citation to avoid plagiarism.
- ☐ Follow netiquette (Internet etiquette) when using or sharing information.

Benefits of the Internet

3. The Internet Serves as a Means to Communicate

- ☐ Enables instant communication with anyone, anywhere in the world.
- ☐ Supports multiple forms:
 - E-mail
 - Chat and messaging apps
 - Voice and video calls
- ☐ Allows real-time conversations at low cost compared to traditional telephones.
- ☐ Widely used by individuals, businesses, and organizations for global communication.

Benefits of the Internet

4. The Internet Provides Access to Learn About Other Cultures

- ☐ Offers unlimited opportunities to explore and understand different cultures.
- ☐ Access to literature, pictures, films, and documentaries about people around the world.
- ☐ Encourages cultural awareness and global understanding.
- ☐ Often free and easily available through websites and social media.

Benefits of the Internet

5. Information on the Internet is Readily Updated

- ☐ News, articles, and videos can be updated instantly and in real time.
- ☐ Social media platforms allow sharing of live updates and video streams easily.
- ☐ Keeps users informed about current events as they happen.
- ☐ Promotes timely access to global information.

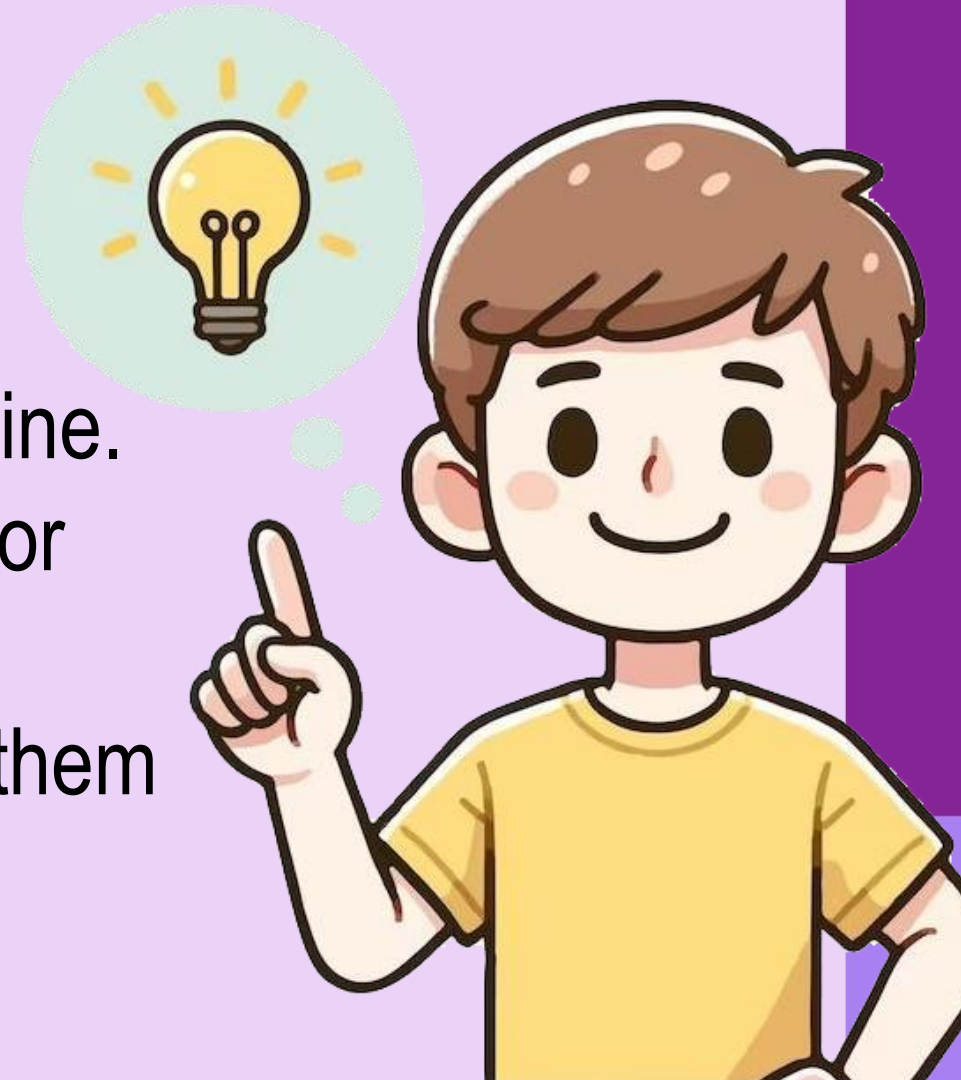

Internet Etiquette (Netiquette)

Internet Etiquette or **Netiquette** refers to the proper and responsible behavior when using the Internet. It helps ensure safety, respect, and professionalism in online communication and activities.

Internet Etiquette (Netiquette)

1. Never Give Personal Information

- ☐ Do not share your address, phone number, Social Security Number, passwords, or credit card details online.
- ☐ These can be used for identity theft or fraud.
- ☐ Keep passwords private — sharing them removes your protection.

Internet Etiquette (Netiquette)

2. Take Care When Posting Photos/Videos

- ☐ Be mindful of what you post online, once uploaded, it's permanent.

Ask yourself:

Would you want your parents, teachers, or future employer to see it?

- ☐ Avoid sharing anything that could harm your reputation or safety.

Internet Etiquette (Netiquette)

3. Spell Check and Proofread Messages

- ☐ Always check spelling and grammar before sending messages or posts.
- ☐ Proper writing shows respect and professionalism online.

Internet Etiquette (Netiquette)

4. Do Not Write in All Capital Letters

- ☐ Typing in **ALL CAPS** means shouting or screaming online.
- ☐ Use capital letters only for emphasis on certain words.

Internet Etiquette (Netiquette)

5. Manage Your Accounts and Profiles Wisely

- ☐ It's okay to use a secondary or “fake” e-mail for privacy, but keep a real account for personal or business use.
- ☐ Remember: Information online is public — post responsibly.
- ☐ Protect your digital identity and reputation.

Internet Etiquette (Netiquette)

6. Do Not Send Personal Insults (Flames)

- ☐ Think before posting or sending messages.

Ask yourself:

Would I say this face-to-face?

Would I want someone to say this to me?

- ☐ Avoid cyberbullying - always be kind and respectful online.

Internet Etiquette (Netiquette)

7. Stay Away from Spam

- ☐ Spam = unwanted or junk e-mails.
- ☐ Most spam messages are scams or phishing attempts.
- ☐ Never click on suspicious links or attachments - delete them immediately.

Internet Etiquette (Netiquette)

8. Shop Only on Secure Websites

- ☐ Use websites with “https://” (the “s” means secure).
- ☐ Protects your personal and financial information from hackers or identity theft.

Internet Etiquette (Netiquette)

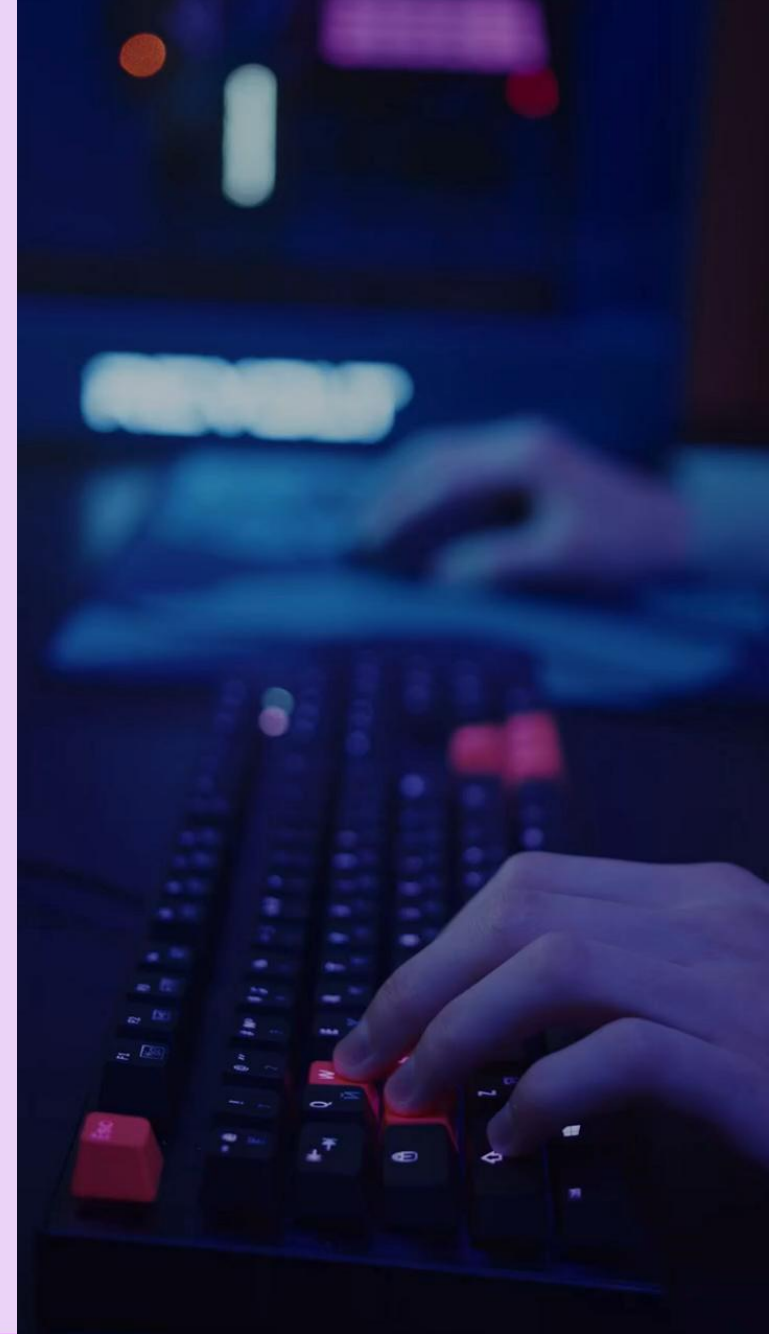

9. Ignore Pop-Up Windows

- ☐ Pop-ups can contain viruses or scams.
- ☐ Never click links in pop-ups — just close the window immediately.

IMPORTANT TERMS USED ON INTERNET AND NETWORK

JOMER O. CASABUENA

*Faculty, College of Arts and Sciences
Central Bicol State University of Agriculture*

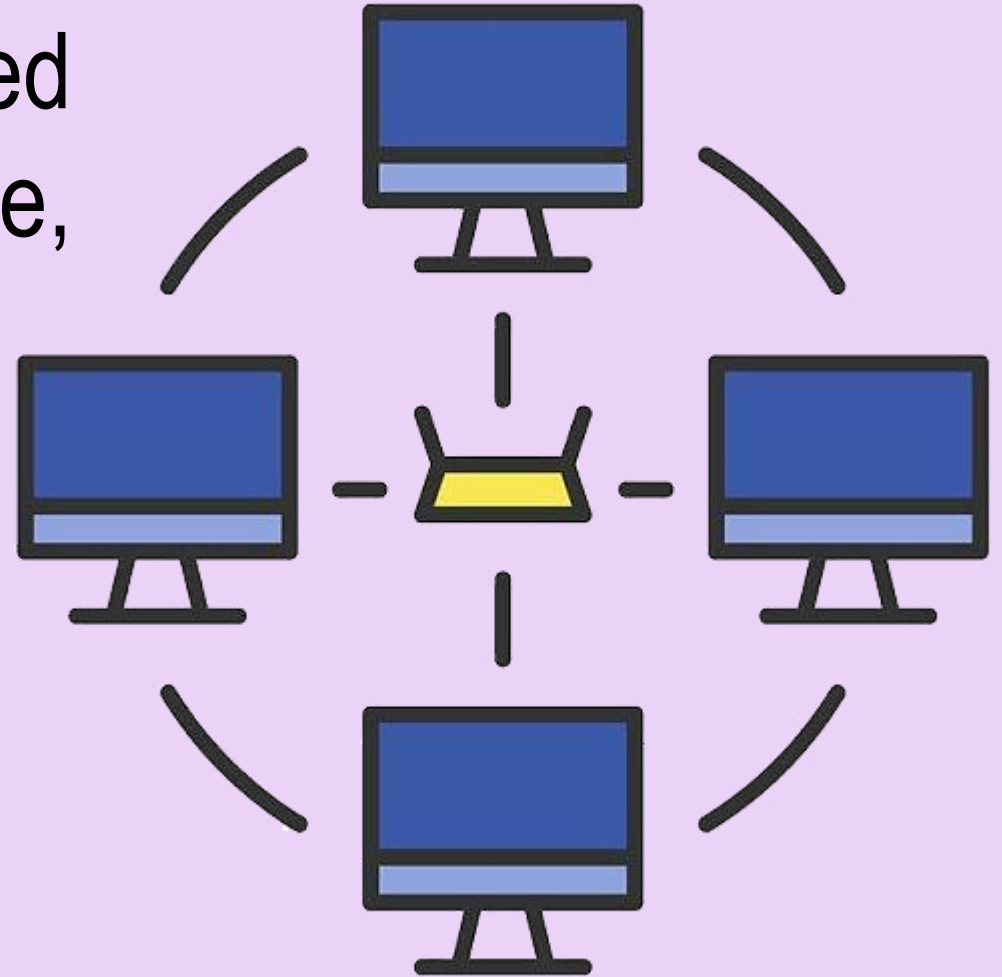

Internet

- A global network of computers connected together to share information and resources.
- It allows communication, browsing, shopping, streaming, and more.

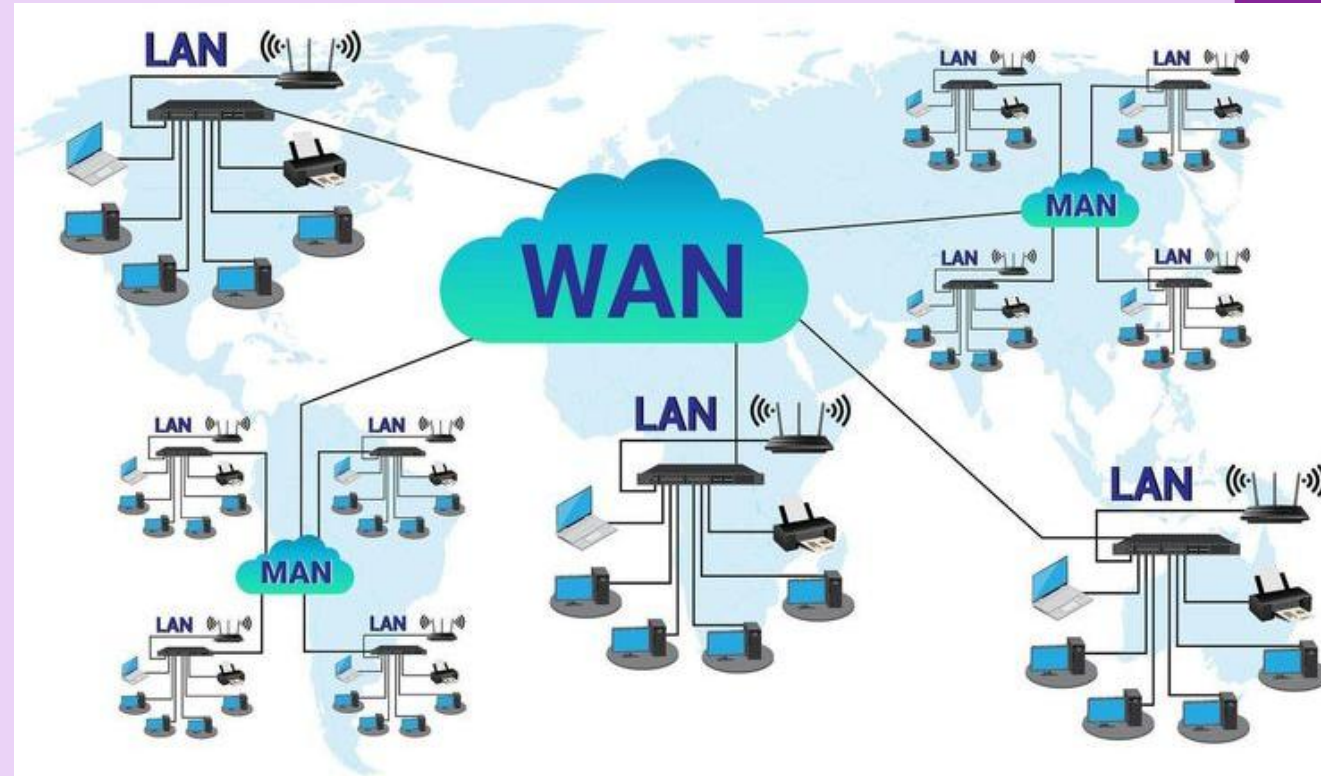

LAN (Local Area Network)

A small network within a limited area, such as a school, home, or office.

WAN (Wide Area Network)

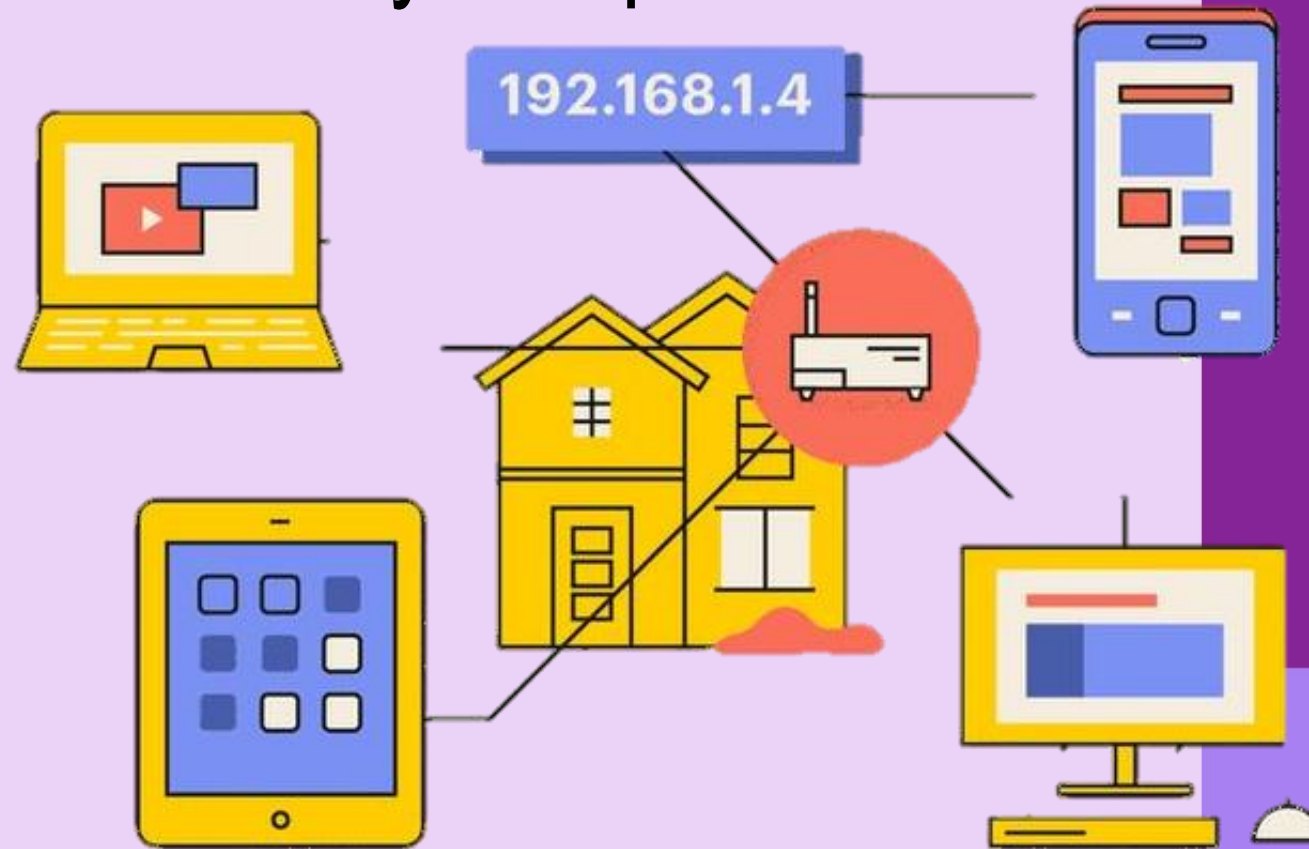

- A large network that connects computers across cities, countries, or continents.
- The Internet is the largest WAN.

IP Address

- A unique number assigned to every computer or device on a network.

Example: 192.168.1.1

Domain Name

- The human-readable name of a website that replaces an IP address.

Example: `www.google.com`

URL (Uniform Resource Locator)

- The complete web address used to find a page or file on the Internet.

Example: <https://www.youtube.com>

HTTP (Hypertext Transfer Protocol)

- The standard rule for transferring web pages on the Internet.
- It defines how messages are formatted and transmitted.

HTTPS (Hypertext Transfer Protocol Secure)

- A secure version of HTTP that encrypts data for safe online communication - used in online shopping and banking.

Web Browser

- A software used to access and view websites.

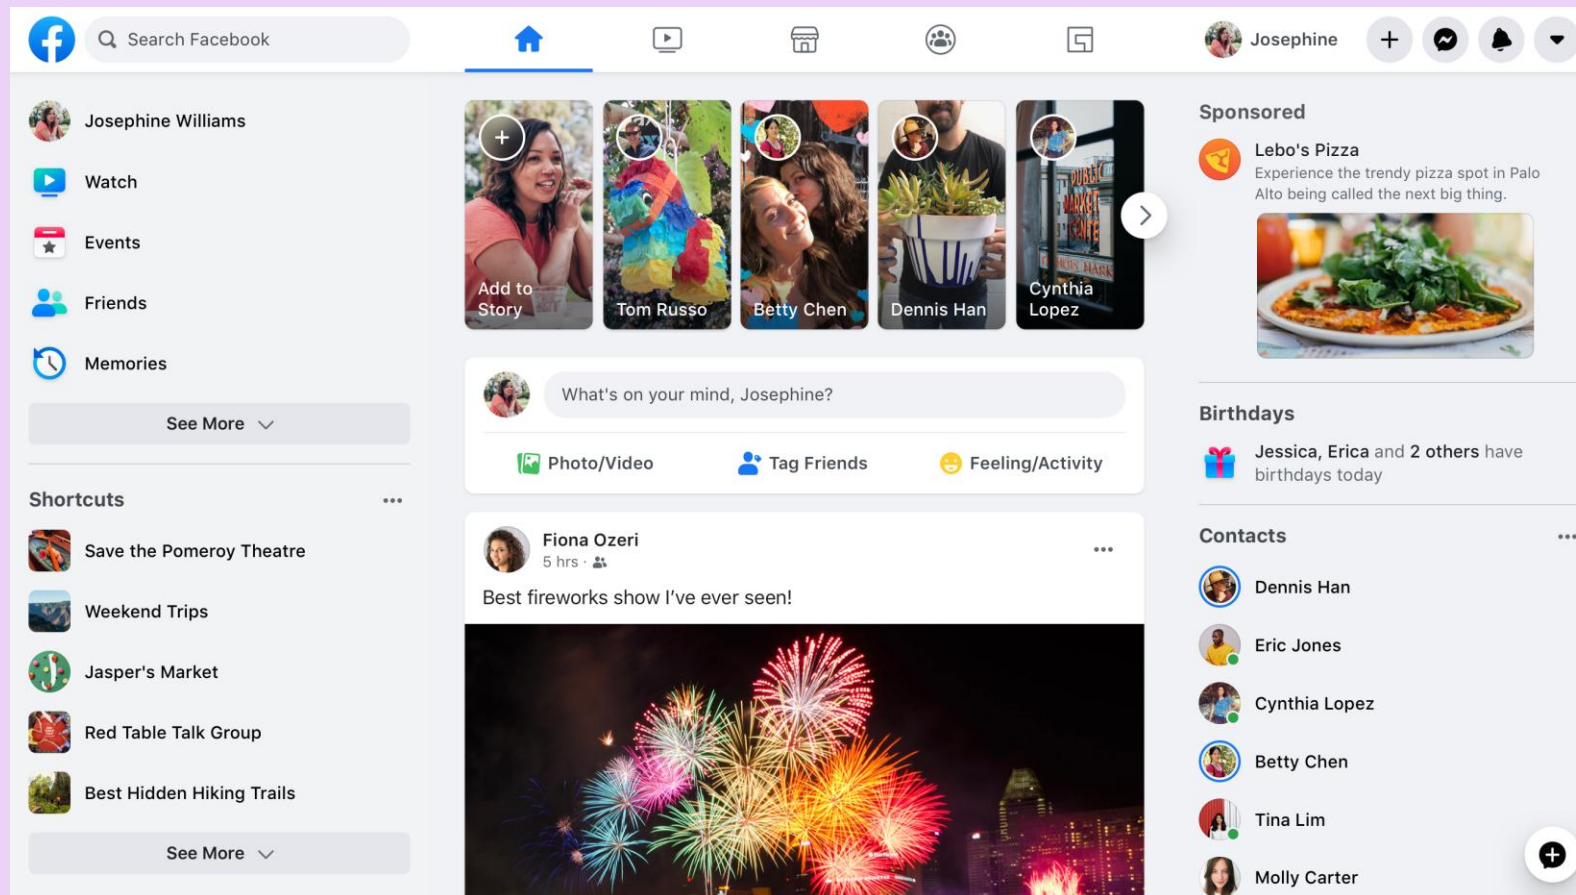

Search Engine

- A tool that helps you find information on the Internet.

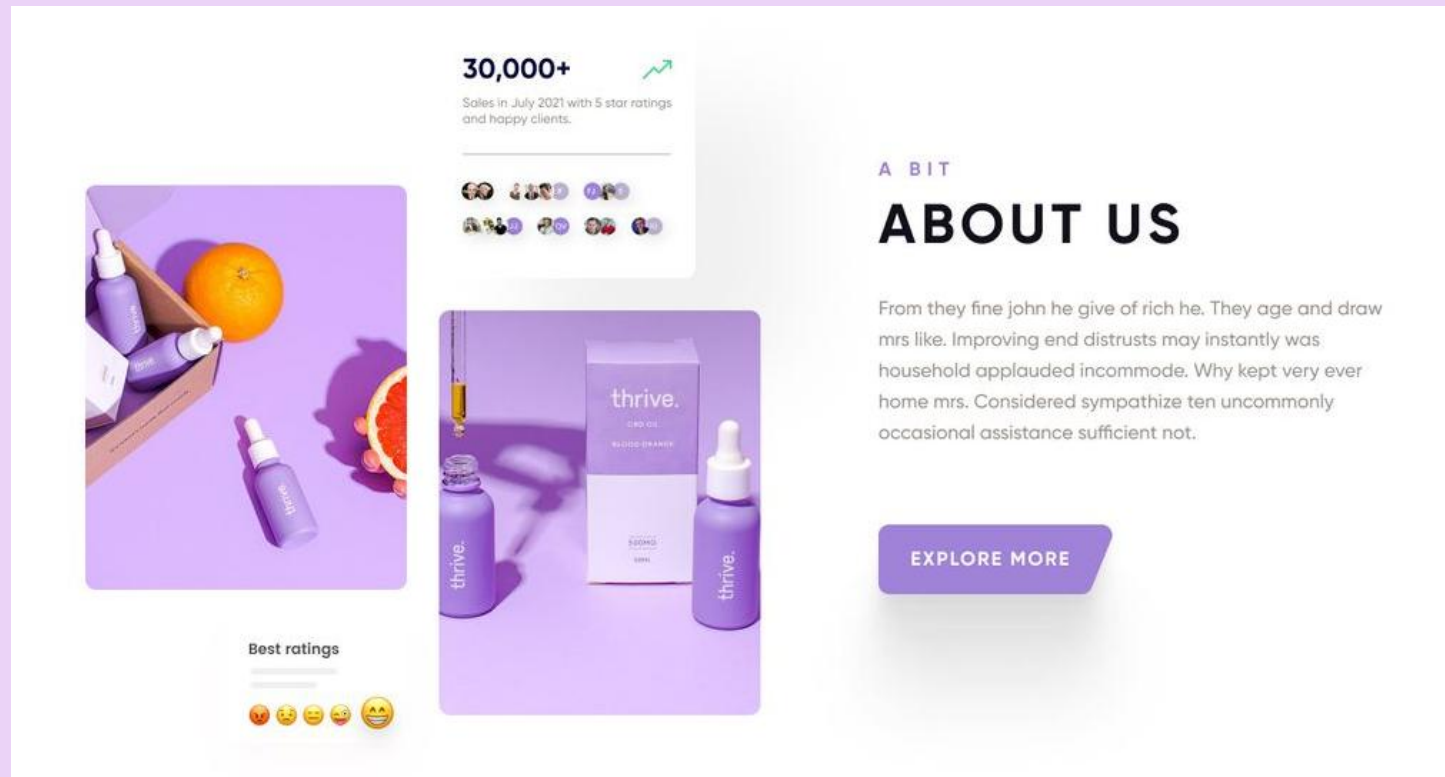

Website

- A collection of web pages stored under one domain name.

Web Page

- A single document or page within a website.
Example: The “About Us” page of a site.

Download/Upload

- **Download:** Copying data from the Internet to your device.
- **Upload:** Sending data from your device to the Internet.

Email (Electronic Mail)

- A method of sending messages instantly over the Internet.

Example: someone@gmail.com

Bandwidth

- The amount of data that can be sent over a network in a certain time.
- Higher bandwidth = faster Internet.

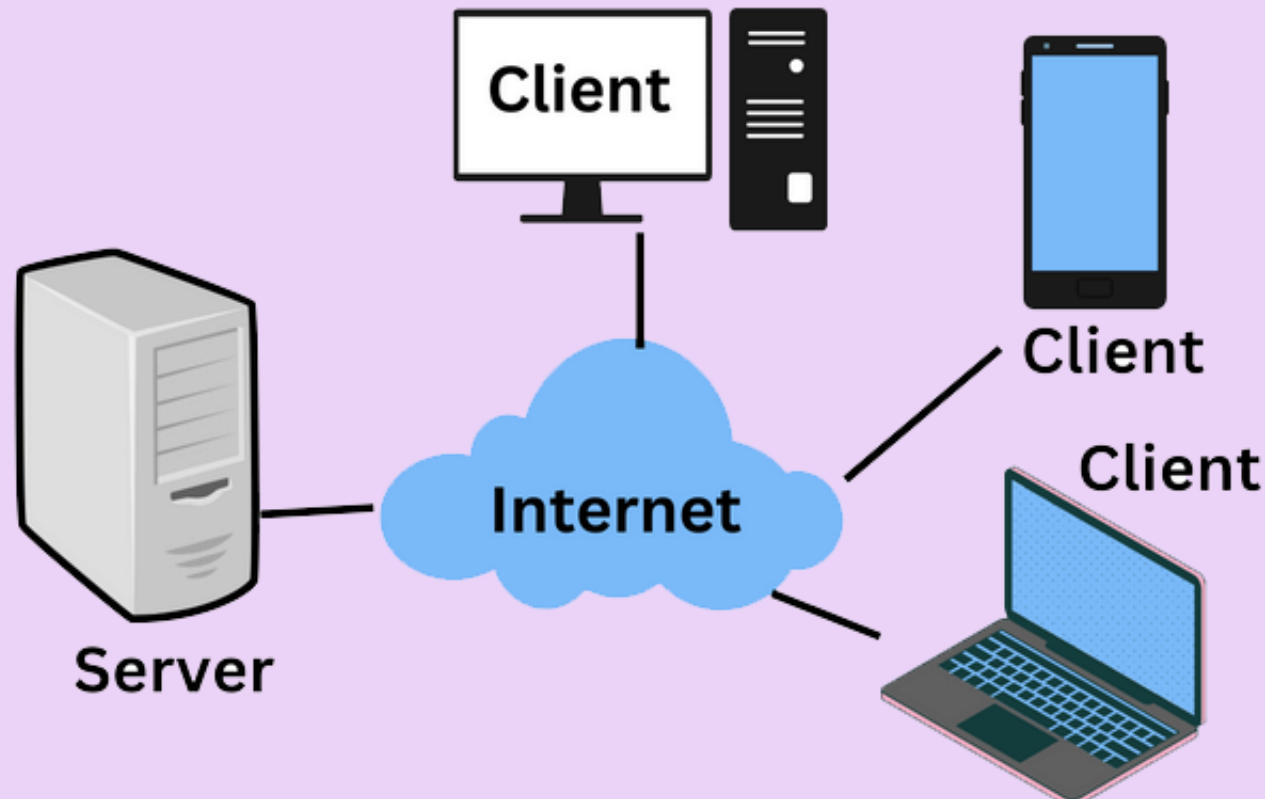

Wi-Fi

- It is a wireless networking technology that allows computers, smartphones, and other devices to connect to the Internet or communicate with each other without using cables.

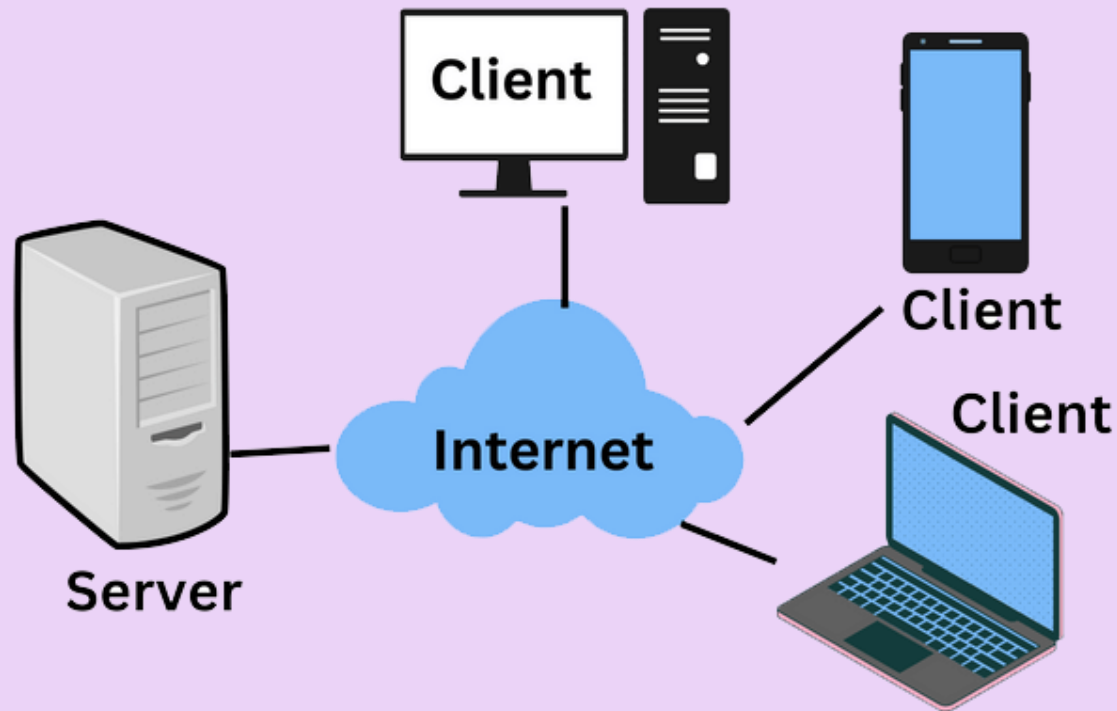

Server

- A powerful computer that provides services, data, or resources to other computers on a network.

Client

- The device or computer that requests information or services from a server.

Firewall

- A security system that protects a network from unauthorized access or hackers.
- It is a security system that monitors and controls incoming and outgoing network traffic based on predetermined security rules. Its main purpose is to protect computers or networks from unauthorized access while allowing legitimate communication.

Router

- A device that connects multiple networks and directs data between them, usually used to connect your home to the Internet.

Modem

- A device that converts signals from your Internet provider so your computer can connect to the Internet.
- Converts digital signals from a computer into analog signals that can travel over communication lines.
- Converts incoming analog signals back into digital form for the computer.
- Provides access to the Internet Service Provider (ISP).

ISP (Internet Service Provider)

- A company that provides Internet access to users.

Globe

PLDT

CONVERGE
ICT SOLUTIONS INC.

SKY

Cloud Storage

- A service that lets you store files online instead of on your computer.

Cybersecurity

- The practice of protecting computers, networks, and data from attacks or unauthorized access.

THANK YOU!
